Q & A BRAINSTORMING

NEW YORK (ALBANY)

Engineering & Technology

What types of engineers were involved in designing your City? How did the engineering design process help you create and develop your Future City?

Teamwork & Project <u>Management</u> How did your team decide how to divide responsibilities? Did any of your team's initial goals evolve as you worked on your project?

Electrify Your Future

How does your City generate enough electricity for its entire population? How are your residents staying safe when working with electricity? What clean, green, and renewable energy sources power your electrical grid?

Q&A Brainstorming

> City Designs, Systems and Operations

How does your City support lowincome or vulnerable residents? What factors did you consider while laying out the zones in your City? Are the zones separate or mixeduse?

<u>Collaboration</u> Can everyone on the project team answer all questions about your City and Model? Can the presenters rotate answering questions?

Use of Model Does your model align with your answers to the above questions? Can you provide examples from your model to answer questions?
